

NOTICE TO MEET STUDENTS

Teaching Organisation - A.Y. 2026/2027

Students enrolled in the Master's Degree Programme in Management for Energy and Environmental Transition (MEET) are informed that each 3-CFU module consists of 75% asynchronous online teaching and 25% in-person teaching, corresponding to 6 hours for each module.

The asynchronous online lectures are pre-recorded by the lecturer and uploaded to the LEARN26 platform, allowing students to watch them at any time from the date on which they are made available. Students are therefore not required to connect to the platform on specific days or at specific times.

First semester

- All pre-recorded online lectures are expected to be available on LEARN26 from 28 September 2026. Only in exceptional cases may some videos not yet be available on that date.
- The 6 hours of in-person teaching for each module will take place between 16 November and 11 December 2026. The detailed timetable will be communicated in October 2026 through LEARN26.

Second semester

- All pre-recorded online lectures are expected to be available on LEARN26 from 8 March 2027. Only in exceptional cases may some videos not yet be available on that date.
- The 6 hours of in-person teaching for each module will take place between 3 and 28 May 2027. The detailed timetable will be communicated in March 2027 through LEARN26.

In-person classes

- The 6 hours of in-person teaching for each module are not compulsory. However, each lecturer may establish different syllabi and/or final assessment arrangements for attending and non-attending students.
- In-person classes will take place at the Department of Economics (DIEC), University of Genoa. No remote connection will be provided during these classes.

LEARN26 platform

LEARN26 is the platform through which students can access the pre-recorded lectures and, at the discretion of each lecturer, slides, readings, announcements and other course-related activities. Students are strongly encouraged to check LEARN26 regularly, as it is the main channel for course-specific information.
